## REACH Declaration

REACH is an European declaration which applies to substances on its own, in preparations or in articles. REACH is the acronym for Registration, Evaluation and Authorisation of Chemicals. REACH came into force on June 1<sup>st</sup> 2007 and -as a regulation- took immediately effect in all EU member states.

Sentec International is well aware of REACH and her responsibilities within the process. We are committed to meet our legal obligations under REACH. Therefore we hereby confirm that our supplies comply with the imposed legal obligations.

Sentec International communicates to its suppliers that they are required to provide material declarations and to update those declarations as new / revised regulatory requirements are defined.

Based on the information provided by our suppliers (regarding article 33) we can as well confirm that our supplies do not contain any of the Substances of Very High Concern (SVHC's) specified in the so-called EHCA Candidate / Authorisation list with a concentration of more than 0.1% w/w (weight by weight).

We commit ourselves to continuously review the actual ECHA Candidate / Authorisation list for changes and updates. We further commit ourselves -if so required- to act in fully compliance with current REACH regulations.

Should you have any further questions regarding the above, please do not hesitate to contact us.

Issued at Lelystad, the Netherlands, February 1st 2021
