GALAXY COATING WB3250 SATIN

The product manufactured by the company mentioned above is a lacquer, which is used for the coating of food packaging materials.

Samples lacquered with it were examined by us according to the

Methoden zur Untersuchung von Kunststoffen, soweit sie als Bedarfsgegenstände im Sinne des Lebensmittel- und Bedarfsgegenständegesetzes verwendet werden, einschließlich der 62. Mitteilung des BfR zur Untersuchung von Hochpolymeren, Bundesgesundheitsblatt 50, 524 (2007), Stand vom April 2007,

(Methods for testing plastics as far as they are used as consumer goods as defined by the Foodstuffs and Consumer Goods Act, including the 62nd memorandum of the BfR on the examination of high polymers, Bundesgesundheitsblatt 50, 524 (2007), state of April 2007),

for the composition of the lacquer and the release of substances which might endanger health as well as according to the

Series of standards EN 1186, EN 13130 and CEN/TS 14234 "Materials and Articles in Contact with Foodstuffs – Plastics", current state,

for the migration behaviour.

Packaging materials coated with the lacquer can meet the demands of the

Regulation (EC) No 1935/2004 of the European Parliament and of the Council of 27 October 2004 on materials and articles intended to come into contact with food and repealing Directives 80/590/EEC and 89/109/EEC, Official Journal of the European Union L 338/4 of 13.11.2004, modified by app. no. 5.17 of the regulation (EC) No 596/2009 of 18 June 2009, Official Journal of the European Union L 188 of 18 July 2009, article 3,

as well as of the

Lebensmittel-, Bedarfsgegenstände- und Futtermittelgesetzbuch (Lebensmittel- und Futtermittelgesetzbuch - LFGB) in der Fassung der Bekanntmachung vom 3. Juni 2013 (BGBl. I S. 1426), zuletzt geändert durch Artikel 97 der Verordnung vom 19. Juni 2020 (BGBl. I S. 1328), §§ 30 und 31,

(Foodstuffs, Consumer Goods and Animal Feed Code (Foodstuffs and Animal Feed Code - LFGB) in the version of the notification of 3 June 2013 (BGBl. p. 1426), last amendment by article 97 of the decree of 19 June 2020 (BGBl. I p. 1328), §§ 30 and 31),

as far as the influence of the lacquer is concerned.

The technical suitability of the lacquer is to be tested in every single case. This also comprises a possible sensory impact on the foodstuff.

Applicable limit values laid down in the

Commission Regulation (EU) No 10/2011 of 14 January 2011 on plastic materials and articles intended to come into contact with food, Official Journal of the European Union L 12/1 of 15 January 2011, last amendment by Commission Regulation (EU) 2020/1245 of 2 September 2020, Official Journal of the European Union L 288/1 of 3 September 2020,

are kept by the lacquered samples.

Thus, the lacquer **GALAXY COATING WB3250 SATIN** according to the sample material submitted may be used safely for the lacquering of food packaging materials. With their lacquered surfaces these may stand in direct contact with dry and fatty foodstuffs, as far as the lacquer grade mentioned above is concerned. For the evaluation a ratio of 6 dm² lacquered surface area in contact with 1 kg food was assumed. The direct contact with moist foodstuffs is approved for a maximum ratio of 4 dm² of the lacquered food packaging surface per kg foodstuff.

Furthermore, the use of the coating grade for the coating of the exterior sides of food packaging materials is safe, as far as the limitations indicated for the contact of the packaging materials with moist and fatty foodstuffs are kept or a sufficient barrier against fat and moisture penetration exists.

This certificate of compliance represents the latest technical standard and is based on the certificate of compliance no. 44084 U 17 of 2 February 2017 in connection with a new partial examination of the product.

It has a validity of 2 years and consists of 4 pages.
