PressClean[®] Washcloth

PressClean-IQ

Is made from highly absorbent wood pulp fiber and PET through a laminating spun laced process.

The product is of a compact texture, softness, excellent liquid absorbency, excellent ink and dust cleaning capacity, good dimensional stability and a good abrasion performance.

It is a preferred cleaning material for the Printing Industry, Electronic Industry and all other industries.

INNOVATION	AtéCé a major global washcloth converter leads the industry with innovative washcloth developments. Our commitment is to continue developing and delivering innovative products that improve quality and printing time on press.
TECHNOLOGY	PressClean Washcloth are being produced with the most advanced production technique available and is the next generation in Washcloths.
RELIABILITY	The consistency and quality of our new Washcloths and improved control gives a superior result on press. PressClean-IQ is Fogra approved.
VALUE	Improvements provided by PressClean improving production time and reducing down-times on press.
ECOLOGY	PressClean Washcloths are another innovation from AtéCé Graphic Products.
