PrintCare Rubber Blankets

Azure Plus

PrintCare Azure Plus is characterized by an exceptional dimensional stability with a sharp dot reproduction and a good solid coverage. The PrintCare Azure Plus has a thicker compressible layer for a better smash resistance and less edge marking. The blanket has a low gauge loss and a excellent sheet release.

INNOVATION	AtéCé a major global blanket converter leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve print results.
TECHNOLOGY	PrintCare compressible layer is the most advanced production technique available and is the next generation in blanket manufacturing.
RELIABILITY	The consistency and quality of our new PrintCare compressible layer technology and improved gauge control from our advanced buffing techniques gives a superior result, faster recovery on press, improved smash resistance and reduces gauge loss.
VALUE	Improvements provided by PrintCare compressible layer means exceptional long life from the blanket, improving production time and reducing down-times on press.
ECOLOGY	PrintCare compressible layer production is solvent free, another first in innovation from AtéCé.

surface

Rubber compound	For sheetfed application
Surface finish	Micro-ground and polished
Roughness (Ra)	0,85 μ m
Colour	Blue

construction

Compressible layer design	Microsphere PrintCare
Nominal thickness	1.96 mm
Fabric plies	2 ply

physical property

Thickness range	1.96 \pm 0.02 mm
Overall hardness (Shore A)	74 °
Compressibility @ 180N	200 μ m
Tensile strength at break	> 70 N/mm
Elongation at 10 N/mm	< 0,75%
