PrintCare Varnishing Plate

Polymer Superior

The PrintCare Polymer Superior is our newest developed product with excellent coating properties. Due to the resistant construction which gives the product suitable for long run water based (aqueous) and UV coating applications.

| INNOVATION | AtéCé a major global blanket converter leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve |
|-------------|---|
| TECHNOLOGY | PrintCare compressible layer is the most advanced production technique available and is the next generation in blanket manufacturing. |
| RELIABILITY | The consistency and quality of our new PrintCare compressible layer technology and improved gauge control from our advanced buffing techniques gives a superior result, faster recovery on press, improved smash resistance and reduces gauge loss. |
| VALUE | Improvements provided by PrintCare compressible layer means exceptional long life from the blanket, improving production time and reducing down-times on press. |
| ECOLOGY | PrintCare compressible layer production is solvent free, another first in innovation from AtéCé. |
