

Product features

Description:

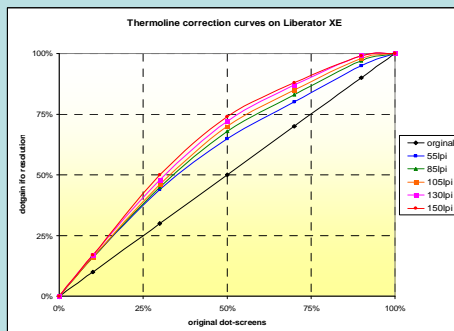

- Thermal film for line and halftone images and colour separations using thermal imagers like Exile and MPM
- Specially developed for small offset, silk screen and flexo printing

Features:

- Easy digital output on Thermal film
- Large and small size formats (Exile imagers)
- No chemical processing & full daylight operation
- Low investment & low operation cost

Photographic characteristics:

- Low Dmin: visual 0.07, UV 0.13
- High Dmax: visual up UV up to 4.50
- Excellent dot sharpness
- Dot gain: compensation in line of resolution. see correction curve alongside (positive output on imager Liberator XE and Harlequin Rip)

Physical characteristics:

- Coated on a 0.12mm polyester base
- 100% scratch & water resistant
- Matting grains for good vacuum and better image copying.
- Good dimensional stability

Packaging:

- Roll length: 61m on core UCT76
