PRODUCT INFO

PRISCO® 2000 Series Fountain Solution

Product Description: **PRISCO 2000 Series Concentrates** are designed for use on sheetfed presses. They may be used in conjunction with alcohol or alcohol substitutes. The **PRISCO 2000 Series** contains alcohol replacement compounds and non-piling additives. Therefore, the series permits substantial reduction in alcohol consumption without significant changes in roller settings, regardless of dampening system. Total alcohol elimination may require the addition of a **PRISCO ALKALESS** alcohol substitute.

Advantages:

- Formulated with alcohol replacements, to reduce alcohol consumption on press
- Fungus growth is effectively eliminated. The **PRISCO 2000 Series** contains a combination of fungicides for cleaner-running dampening systems and less frequent cleaning of tanks, lines and filters.
- Runs well in any type of dampening system, resulting in cleaner reverses, better ink lay, little or no piling and superior trapping
- Phosphate-free for less impact on the environment

Product Name	Water Condition #/kg/L	pH Range	Product Code
2351	Soft <220 PPM R.O. and D.I.	3.9 - 4.0	C110
2451	Medium 220 - 250 PPM	3.8 - 4.0	C111
2566	Hard >250 PPM	3.8 - 4.0	C130

Directions:

1. For conventional dampening systems: mix 1 - 3% of **PRISCO 2000 Series** to water to obtain the pH indicated in the table.
2. For reducing alcohol in continuous dampening systems: mix 2 - 4% of **PRISCO 2000 Series** to water. After determining optimum dosage, measure C.O.W. (Conductivity Over Water) for reference when making additional batches.

READ MSDS BEFORE USING THIS PRODUCT

Packaging: 5 Liter plastic bottles (4 per case)
25 Liter can
200 Liter drum

NOTE: Plastic pumps are required for 200 Liter drums.
