

Types of Maintenance Liquid and Selection Procedures to Use Them (For UV Printers)

Refer to the following procedures to select the appropriate maintenance liquid for each daily care and maintenance.

Table 1 lists the maintenance liquids used with the UV printer. Confirm beforehand that the bottle to be used is the appropriate maintenance liquid.

➔ When using the PR-200, refer to the operation manual and also use the Maintenance Liquid **13**.

Table 2. Correlation table between ink types and maintenance liquids

No.	Name and part number	Purpose and effect	Applicable ink type
11	Maintenance Liquid 11 kit (ML011-Z-K2)	<u>For maintenance of nozzle surface</u> The nozzle surface is kept in the normal condition to prevent discharge failure.	LH-100 LU-125 LUS-120 LUS-170 LUS-175
	Maintenance Liquid 11 bottle (ML011-Z-B2)		
13	PR-200 Maintenance Liquid kit (ML013-Z-K2)	<u>For PR-200 nozzle cleaning</u> Removal of foreign matter near a nozzle which PR-200 ink is used. This maintenance is not effective for inks other than PR-200.	PR-200
	PR-200 Maintenance Liquid bottle (ML013-Z-B2)		
15	Maintenance Liquid 15 kit (ML015-Z-K1)	<u>For daily care and nozzle cleaning (other than PR-200)</u> Maintenance liquid that makes it easier to clean the dirt adhering to the nozzle surface and parts.	LF-140 LH-100 LU-125 LUS-120 LUS-150 LUS-170 LUS-175 LUS-200 LUS-350 MUH-100-Si PR-100 PR-200
