

FORMPACK BOX

The eco-friendly cushioning alternative in a box

Formpack BOX is the ideal aid for speedy and particularly environmentally friendly package shipping for small and medium-sized quantities (e.g. for e-commerce newcomers or professionals). A cost-effective, customised solution, Formpack is perfect for filling and cushioning packages.

It is ideal for online shop operators or private package shipping – and everybody who consciously wishes to avoid using bubble wrap. With a footprint of only 30 x 40 cm, the box can be accommodated in any corner and used as a mobile unit. It can be operated as a horizontal or vertical solution, and a tear-off edge aids easy detachment of the paper.

The embossed material has excellent padding characteristics and is extremely absorbent. The paper is therefore ideal for use as deflection material, as an intermediate layer or for covering and protects against transportation damage and damp.

Formpack consists of 100 % waste paper, is free of chemical ingredients and fully recyclable.

You can use Formpack everywhere as an alternative to bubble wrap and thus contribute to avoiding plastic waste.

- Dimensions: 30 x 40 x 30 cm
- Paper quality: 125 g/m²
- Weight: approx. 3.3 kg
- 48 Boxes/Pallet
- Linear metres: 55 m
