

COATING WB 1050 Intensive Anilox Cleaner

Galaxy Coating WB1050 is a balanced intensive cleaner for deep cleaning and dissolving dried coating layers. It cleans aqueous coatings as well as gold, silver and pearlescent coatings. With regular and correct use on the anilox rolls any residual coating is removed, helping to considerably extend the interval between thorough cleaning of the rolls by external parties.

Application: The product is ready to use. We recommend to apply a thick layer of gel with a lint-free, soft cloth. Allow the product to act for up to two hours. Then rinse with plenty of water.
 This strong cleaner is **not** intended to be used as cleaner for stripping plates, rubber blankets and Cyrel plates.
 The product is complete solvent free and biologically degradable.

Use: Use undiluted for best result
 Not for use with stripping plates, rubber blankets and Cyrel plates

Safety info: Cleaners are irritants to eyes and skin. Wear suitable gloves (ie nitrile) and goggles while using the product. See MSDS for more information.

Typical constants:	Appearance	White, transparent gel	
	Smell	Very low	
	Density	1.00 g/m ²	± 0.01
	pH	Approx. 14	

Storage conditions: Protect from frost, excessive heat and direct sunlight. Store in original packaging.

Shelf lifetime: In unopened, original packaging, 12 months from manufacturing date

Version: 01-2012

The information provided in this technical data sheet is to inform our customers. A successful application depends on a variety of different factors. Therefore the advice given in this technical data sheet cannot be used as basis for claims. Our recommendation is where possible to perform tests before entering production runs. We reserve the rights to change product characteristics because of technical progress, amendment of applicable law and mandatory production related needs.
