

REACH information requirement: Epson Article Declaration

As a part of Epson's commitment to the environment we continuously work on improving the environmental performance of our products. In recent years the focus of our environmental program has, amongst others, been focused on the safe use of chemical substances within our products. The continuous efforts of our engineers will ensure that all our products meet the requirements of the European REACH (EC) No 1907/2006 Regulation.

The candidate list has been first published on 28 October 2008, and recently updated on 16th January 2020. You can find the updated version of the candidate list on the official website of the European Chemical Agency: <https://echa.europa.eu/candidate-list-table>

The candidate list for authorization consists in the first step of the authorisation process established by REACH Regulation. The substances to be included into this list are substances of very high concern, as defined by the Directive 67/548/EEC on dangerous substances. This list is a living document: it is to be updated on a regular basis.

According to Article 33 of REACH Regulation, as soon as the candidate list is published or updated, any supplier of an article containing a substance on the candidate list in a concentration above 0,1 % weight by weight (w/w) shall provide direct customers with sufficient information on this substance to allow safe use of the article.

Epson conducted a chemical survey for all our products which could contain the substances included within the first candidate list. The survey has now been finalised.

Please refer to the annex of this letter for Epson general declaration.

Date: 5 March 2020

REACH Epson Article Declaration

1. Identity of supplier

| |
|---|
| Name of supplier: Epson |
| Internet address: http://www.epson.eu |
| Contact Person: Boris Manev – Head of CSR and Government Affairs EMEAR |
| Contact details: chemicals@epson.eu |
| Date of candidate list: 16 th January 2020 |

2. Substances included on the candidate list contained in Epson products

According to article 59 of the Regulation (EC) No 1907/2006 (so-called REACH Regulation), the candidate list has been published on the website of the European Chemical Agency: <https://echa.europa.eu/candidate-list-table>.

The majority of products and packaging as manufactured and/or supplied by Epson do not contain substances on the REACH SVHC candidate list in concentration over 0.1% by weight per product. The articles listed below may contain SVHCs listed on the candidate list over this threshold.

| Substance name | CAS number | Article | Application |
|---|-------------------------|----------------------|---------------------------------|
| Boric acid | 10043-35-3 / 11113-50-1 | Photo papers | Additives (hardner) for coating |
| 1,2-dimethoxyethane; ethylene glycol dimethyl ether (EGDME) | 110-71-4 | 3D Glasses (ELPGS01) | Solvent in lithium battery |
| Lead | 7439-92-1 | Spare Parts | Alloy |
