PrintCare Varnishing Plate

Polymer Xtra

PrintCare Polymer Xtra is our newly developed polyester backed varnishing plate for offset coating. The abrasive resistant surface gives an excellent coating transfer. Due to the soft top compound this product is very suitable to apply "Soft Touch Coating" and other special coatings.

| INNOVATION | AtéCé a major global blanket converter leads the industry with innovative blanket development. Our commitment is to continue developing and delivering innovative products that improve |
|-------------|---|
| TECHNOLOGY | PrintCare Xtra surface is the most advanced production technique available and is the next generation in blanket manufacturing. |
| RELIABILITY | The consistency and quality of our new PrintCare compressible layer technology and improved gauge control from our advanced buffing techniques gives a superior result, faster recovery on press, improved smash resistance and reduces gauge loss. |
| VALUE | Improvements provided by PrintCare compressible layer means exceptional long life from the blanket, improving production time and reducing down-times on press. |
| ECOLOGY | PrintCare coating plate production is solvent free, another first in innovation from AtéCé. |
