

Universal Gum RTU for plates. It is a gum for use in plates processors, for the protection of all types of lithographic plates during storage periods prior to re-printing, due to its efficient protective stability during extended periods of time.
Low viscosity protection gum for offset plates. Ready to use

Product Usage

It is supplied ready to use, in automatic plates processors, immersion trays and manually.
Plate processors application: Ready to Use.

When used manually, extend it over the plate surface, as evenly as possible, to avoid any possible excessive accumulation over the printing area .

Directions

Ready to use without dilution.

Features

- Excellent protection of the plate.
- Eliminates scratches by plate handling.
- Very good wetting.
- Removed very easily and leaving no residue.
- Image areas do not lose their ink-up capacity.
- Permanent elasticity
