

## Water Conditioner H

Galaxy Water Conditioner H is an aqueous solution containing salts to restore the requested hardness of the demineralized or softened water for fountain solutions. The composition of Water Conditioner H is adjusted for standard 0-5% dosing pumps  
 Water Conditioner H contains extra biocides to prevent biological growth in the fountain circulation system.

**Application:** The standard dosage of 4% for demineralized water gives the ideal hardness of 10 DH.  
 The additional conductivity increase by 4% of Water Conditioner H will be 300µS.

**Procedure to use:** Dose 2-4 % of Water Conditioner H by means of a separate dosing pump.

**Product parameters:**

Appearance	Clear liquid	
pH	6.5	± 0.3
Specific gravity	1.02 g/cm <sup>3</sup>	
Flash point	NA	
Class	NA	

**Storage conditions:** Store at room temperature conditions.

**Shelf life:** In unopened, original packaging, 24 months from manufacturing date

**Packaging:** 5kg, 20kg jerrycan, 200kg PE-Drum. One way packaging.

Version: 01-2012

The information provided in this technical data sheet is to inform our customers. A successful application depends on a variety of different factors. Therefore the advice given in this technical data sheet cannot be used as basis for claims. Our recommendation is where possible to perform tests before entering production runs. We reserve the rights to change product characteristics because of technical progress, amendment of applicable law and mandatory production related needs.
