

## STATEMENT

DIGIDELTA INTERNACIONAL - Importação e Exportação, S. A. has made changes to the coatings indicated in the following classification reports:

- RC 0017/2021-URF
- RC 0018/2021-URF
- RC 0019/2021-URF
- RC 0023/2020-URF
- RC 0025/2020-URF
- RC 0027/2020-URF

Thus for classification report RC 0017/2021-URF and RC 0018/2021-URF the articles that used the liner with the designation *clay coated PE embossed* will now use the liner with the designation *double side PE*. The other liners used in these articles remain unchanged.

Classification reports RC 0019/2021-URF, RC 0025/2020-URF and RC 0027/2020-URF no longer use the liner designated *clay coated Kraft paper*, but the liner designated *double side PE*. The other liners used in these articles remain unchanged.

Finally, for classification report RC 0023/2020-URF, the *clay coated paper* liner is no longer used, but the double side PE liner.

The LNEC is in a position to confirm that the change to this liner will not change the fire reaction performance of the products indicated in the classification reports mentioned above. The liner is not part of the product when subjected to the test conditions, i.e. the fire reaction classification of the product is obtained without the liner.

Lisbon, LNEC, 17 May 2022
