J-throne 29 UV Inkjet sheetfed

Maximum speed	6.000 sph (simplex mode) 3.000 sph (duplex mode)
Colors	CMYK- 4 color process
Resolution	1.200 dpi
Paper sizes	585 x 750 mm, 510 x 711 mm, 485 x 635 mm, 432 x 560 mm
Paper thickness	single: 0,06- 0,6 mm double: 0,06- 0,45 mm
Ink	LED UV Inkjet
Available substrates	"Coated & uncoated paper and paperboards Plastic and synthetics are possible subject to factory confirmation"
Variable printing	100%

Feature	Benefit
Printing speed	Improved productivity for straight and double-sided printing in one pass. Best in B2-class.
Inks	UV-Inkjet inks developed by Komori. Immediately dry and ready for postpress. Highly pigmented for a wide Gammut. No precoating required.
Feeder and sheet transport	Very precise sheet transfer and register accuracy due to Komoris excellent knowledge in offset sheetfed business.
Duplex printing	Superior perfecting register accuracy because paper is inverted by gripper to gripper system.
Pre-Heating	Reduced Pre-Heating of inks and substrates causing higher machine availability and lower costs
